

EBB-40KW LP Trailer

Bed Bug Heat Treatment Equipment Package

An Environmentally Friendly Alternative

To battle insecticide resistant bed bugs, TEMP-AIR has developed a line of bed bug heat treatment equipment – a safe and effective pest control tool. In our commitment to further develop this environmentally friendly process, TEMP-AIR, with support from the Propane Education & Research Council, is now introducing the EBB-40KW LP Trailer.

According to PERC, propane is an approved, clean fuel listed in the 1990 Clean Air Act and Energy Policy Act of 1992 and is one of the cleanest burning of all fossil fuels.

The EBB-40KW LP Trailer System is ideal for the heat treatment of bed bugs in apartments, dorms, hotels and single family homes. This four electric heater system can typically treat up to 1400 sq. ft. based on 6-8 hour treatment times. With its own propane power source, this package is ready to tow-n-go to the treatment site.

Why Propane?

- Reduced greenhouse gas emissions
- Lower maintenance and repair costs of engine
- Easier cold weather start-up with electric vaporizer
- No loss of quality (gelling or deterioration) of propane with long term storage
- Longer run time (larger fuel tank)
- Readily available – over 6,000 retail propane dealer locations throughout the U.S.

Technical Specifications

Dimensions (LxWxH): 15'x 8' 4" x 8'

Weight (fully loaded): 6300 lbs

Generator: 40KW 460V/60Hz/3Ph Propane Generator with 4.3 ltr Vortec V6 engine

Propane Tank: 75 gallons

Other features: electric vaporizer, auxiliary propane port, external fueling port, electric heaters, and treatment accessories
